PERSONAL PROJECTS

Student Result Management System

- The Student Result Management System is a web-based application designed to streamline academic record management for colleges.
- It enables faculty members to update student details and subject-wise marks while allowing students to access their semester-wise results.
- The system supports multiple courses, with semester-based result management.
- Built with an intuitive interface and secure database handling, this system enhances efficiency and accuracy in academic data processing.
- Future plans include developing an Android application for enhanced accessibility.

Employee Management System

- Engineered dynamic Android application using .net, SQL, android Studio, Java.
- The EMS (Employee Management System) app is a robust solution developed using .NET for backend processing, Java for business logic, Android Studio for an intuitive mobile interface and SQL for secure and efficient data management.
- The app simplifies HR operations by managing employee records, attendance, payroll, and performance evaluations, providing organizations with an efficient tool to handle their workforce operations seamlessly.

COLLEGE PROJECTS

E-Commerce Website

- Worked as part of a team to build a fully functional e-commerce website using HTML, CSS, and JavaScript, delivering a seamless shopping experience.
- Integrated Firebase Authentication to securely handle user sign-ups, logins, and password management, ensuring data security and user privacy.
- Set up a Firebase database to store user details and order histories, optimizing data access and retrieval for efficient order processing.
- Contributed to front-end design, creating responsive and intuitive interfaces that align with e-commerce standards, enhancing user engagement.
- Scoped out secure payment gateway integration as a future development phase, ensuring a scalable design to support various payment options for enhanced user convenience.

CERTIFICATION COURSES

- Google Analytics Course by Google.
- Python Basics For Data Science from EdX.
- AI With Python by Great Learning.
